

**CE-marked** 

**SOL-CARE™** Safety Syringe is a retracting needle manual safety syringe. It is designed to prevent needlestick injuries and syringe reuse by retracting the needle into the barrel.

- Compatible with all standard hypodermic needles.

  Easy to use.
- Fingers remain behind the needle during activation of safety mechanism.
- Clear and bold scale markings.
- Visual and audible confirmation of safety mechanism activation.

# SOL-GUARD™ Safety Syringe and Insulin Syringe with Fixed Needle

#### Features & Benefits

**SOL-GUARD™** product line covers a safety-engineered Syringes with Fixed Needle for various types of injections. It is designed to reduce the risk of needlestick injuries to patients and healthcare workers before and during the injection process.

Transparent Locking Safety Shield with Easy Grip Ridges - protects during transportation.

Transport Position - eliminates the need to recap the needle after draw-up of medication.

Low Dead Space - reduces medication waste.

Clear and Bold Scale Markings.

# SINGLE USE ONLY Sol-GUARD

#### Instructions for use

Draw up the desired dose of medication as per facility protocol.

Extend the safety shield forward over the top of the needle until you feel the positive stop and hear an audible click.

This ensures the safety shield is in place for safe transportation of the syringe to the patient.

Retract the safety shield until it snaps into its original position and administer medication as per facility protocol.

Immediately following injection, extend the safety shield forward fully until an audible click is heard. To lock the safety shield, twist in either direction until you feel the positive stop and hear an audible click.

Syringe cannot be reused once activated.

## SOL-M<sup>™</sup> Oral Dispensing Syringe

#### For safe oral application of medicine:

3-piece syringes with O-ring.

Available capacity: from 1ml to 20ml.

Clear scale markings for maximum accuracy.

Not made with natural rubber latex.

Special tip design - will not accept luer connector, preventing medication errors and accidental intravenous injections of oral liquids.

Amber barrel - designed for light-sensitive drugs, in compliance with United States Pharmacopeia (USP) requirements.

Purple plunger - alerts clinician that syringe is for oral use only.

Two different packaging options:

- Sterile, individual blister.
- Non-sterile, bulk.

Press-in bottle adapters and tip caps available. Bottle adapters:

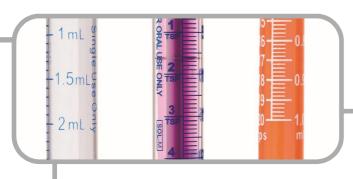

D-28 - REF. 2110BA

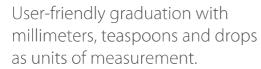

D-24 - REF. 2100BA

## SOL-CARE™ Safety Blood Collection Tube Holder Set

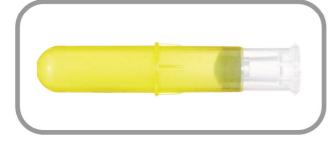

**SOL-CARE™** Safety Blood Collection Tube Holder Set is a high-quality and high-tech blood collection device, designed to improve the performance of healthcare workers, while also offering maximum safety.

#### Holder

Compatible with:

- standard and flashback multi-sample needles.
- standard blood collection tubes.

#### **Vacuum Activation Tube**

Retraction technology to capture the needle after blood has been collected

Ref. number: 7001BCD

Sales Unit: 50 pcs/Box; 400 pcs/Case

**Minimum training requirement** - "Using the yellow activation tube is like adding a blood collection tube".

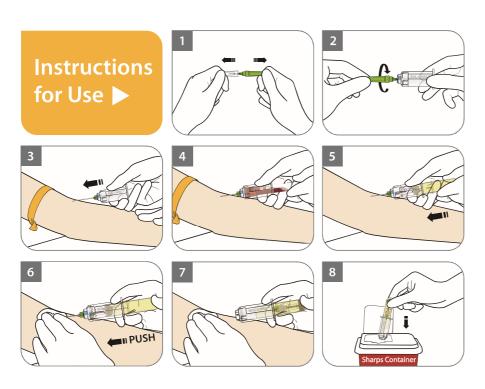

**In-vein retraction** - effectively reduces the risk of needlestick injuries and blood exposure.

**Speed of needle retraction** - lower risk of vein damage.

### SOL-CARE™ Safety Blood Collection Tube Holder Set

- The safety mechanism is an integral part of the device and **doesn't block the sight** of the needle tip.
- Activation virtually eliminates exposure to both ends of the contaminated needle, reducing the risk of needlestick injury.
- Allows users to **keep** both **hands behind the needle** when activating the needle retraction feature.
- **Complies with OSHA regulations** to prevent cross-contamination.

SOL-CARE™ Safety Blood Collection Tube Holder Set with Pre-attached Multi-sample Needle

SOL-CARE™ Safety Blood Collection Tube Holder Set with Pre-attached Flashback Needle
