## Now You Can Get Comfortable with Security

Keeping catheters safe and secure is vital to you and your patient. A secure catheter helps prevent pistoning and accidental dislodgement while enhancing patient comfort. Dale Hold-n-Place securement dressings are designed specifically to keep the catheter positioned properly and accommodate each patient. Once the device is in place, you can be confident the line is reliably secure.

### All The Features You Want

- Soft and flexible design with no hard plastic parts for improved patient comfort
- No skin prep required for application and no alcohol required for removal
- Provides superior securement for both horizontal and vertical lifting accidental line pulls
- Hypoallergenic, breathable and not made with natural rubber latex to reduce the risk of allergic reactions and skin irritation
- Protects skin from hard plastic parts
- Secures catheters and lines from the top, bottom and sides

*Designed for Virtually Any Line*

#### Seeing is Believing

We'll help you put Dale Hold-n-Place Catheter Securement to the test. Ask your Dale representative about a no-obligation, free trial offer, or call 800-343-3980.

### Hold-n-Place for IV, Arterial and Mid-line Catheter Securement

- Secures IV lines and Luer hubs using the familiar chevron technique
- Maintains optimal catheter insertion angle
- Protects skin from hard plastic parts

### Hold-n-Place for CVC, PICC and Arterial Sheath Securement

- Secures CVC and PICC lines using the familiar chevron technique
- Suture-free securement for protection from needlestick injuries

### Hold-n-Place for General Purpose Securement

- Secures catheters and lines using repositionable hook and loop closure
- Available in small, medium and large

## Dale® Nasogastric Tube Holder

The Dale Nasogastric Tube Holder is ideal for holding most nasogastric tubes, including nasoenteric, Salem Sump®, and Levin stomach tubes.

- Skin-friendly adhesive stays in place for up to 3 days, yet is easy to remove.
- Breathable material.
- Unique dual interlocking tabs spiral around the nasogastric tube for superior tube security.
- Non-adherent plastic tips on both tabs make tube removal safer and easier, especially when wearing gloves.
- Single patient use only.
- No scissors required.
- May also be used to secure most nasal catheters used for manometry and pH impedance testing

160	Large / Adult	50 per box
161	Small / Young Adult / Pediatric / Geriatric	50 per box

# IV Line Solutions

## Dale® IV-ARMOR®

Dale's IV-ARMOR minimizes downstream occlusions while enabling patient movement. The flexible protective overlay is the ideal way to maximize IV patency while protecting the site from patient tampering.

- Reduces the introduction of infection associated with IV reinsertion.
- Reduces downstream occlusion alarms.
- Reduces risk of catheter kinking in a bend such as a wrist or elbow.
- Reduces risk of catheter movement in an area of bony prominence, such as back of hand or forearm.
- Skin friendly adhesive.

### ORDERING INFORMATION

Product Number	Size	Quantity
675	One size fits most	10 per box

## Dale® Bendable ArmBoard

The Dale Bendable ArmBoard allows the patient's hand and wrist to maintain their natural position while securely and comfortably preventing catheter movement.

- Bendable inner core can be custom shaped to desired position – Enables clinician to hyperextend patient's wrist for pronounced radial artery exposure, trouble-free insertion and line integrity.
- Adjustable hook & loop closures provide comfortable, snug fit.
- Soft, plush lining enhances patient comfort.
- Four convenient sizes.
- MR Conditional.

### ORDERING INFORMATION

Product Number	Size	Quantity
650	Large, 23cm x 9cm (9"x3.5")	10 per box
651	Medium, 13.7cm x 6.4cm (5.38"x2.5")	10 per box
652	Small, 11.4cm x 4.4cm (4.5"x1.75")	10 per box
653	X-Small, 10.8cm x 2.5cm (4.25"x1")	10 per box

# Respiratory

## Dale® Stabilock Endotracheal Tube Holder

The Dale Stabilock Endotracheal Tube Holder provides a fast and easy way to secure endotracheal tubes and help prevent accidental extubation.

- Cushioned neck band is soft and comfortable on the face and neck.
- Skin-friendly adhesive can be left in place up to 3 days.
- Tubing channel is made of lightweight, flexible material to securely hold the endotracheal tube.
- Hook & loop closures provide a secure fit.
- Easy repositioning reduces risk of skin and lip ulcerations.
- Easy access for oral care.

### ORDERING INFORMATION

Product Number	Size	Quantity
270	Fits endotracheal tube sizes 7.0mm-10.0mm	10 per box
273	Adhesive base	10 per box

## Dale® Tracheostomy Tube Holders

The Dale Tracheostomy Tube Holder is designed to provide secure positioning and minimize movement of the tracheostomy tube. Unnecessary movement of the trach tube can result in accidental dislodgement or displacement of the tube, tracheal fistula, tracheal stenosis, or airway granuloma.

- Eliminates the frustrations associated with twill ties and other holders while minimizing secondary complications.
- Moisture wicking neck band lining reduces the risk of skin breakdown.
- Fastener tabs quickly and securely attach to the tracheostomy tube holder.

## Dale® Post-Surgical Bra

The Dale Post-Surgical Bra provides the support and compression patients need immediately following breast surgery. Soft, breathable fabric stretches to accommodate edema without binding or irritating sensitive tissue.

- Front hook & loop closure facilitates inspection of the surgical site and dressing changes.
- Ideal for use during radiation treatment.
- Can be worn alone or can be used to hold surgical dressings in place without tape.
- Indicated for use after a wide range of surgical procedures: Reduction, reconstruction, lift, augmentation, mastectomy, lumpectomy, biopsy, and fine needle aspiration.

# Medical/Surgical

## Dale® Nasal Dressing Holder

The Dale Nasal Dressing Holder replaces adhesive tape to hold nasal dressings in place following rhinoplasty, septoplasty, sinus surgery, facial trauma and nose bleeds. Clear plastic dressing holder is secured by ear loops. Hook and loop fastener tabs can be adjusted to fit any patient comfortably.

- Soft moisture repellent material adds to comfort.
- Plastic center section holds dressings in place without absorbing secretions.
- Easy to remove and replace, making dressing changes simple and painless.

### ORDERING INFORMATION

Product Number	Size	Quantity
600	One size fits most	10 per box

## Dale® Transducer Holder

The Dale Transducer Holders offers a level and secure platform for up to three transducers. Stability ensures correct waveform readings and corresponding numerical display.

- Platform conforms to patient's arm.
- Soft, comfortable material with adjustable hook and loop closures.
- Three holding tabs reduce the time associated with manual re-leveling and taping individual transducers to the patient's chest, arm, or mounting on the bedside pole.
- Increases organization and security of hemodynamic catheters during transportation.

### ORDERING INFORMATION

Product Number	Size	Quantity
620	One size fits most	10 per box

## Dale® Hold-n-Place® Foley Catheter Holders

Dale Hold-n-Place Foley Catheter Holders stabilize the indwelling catheter, reducing the likelihood of traumatic removal, without restricting patient's movement or irritating the skin. All Dale Hold-n-Place Foley Catheter Holders feature unique locking systems that securely anchor the catheter in place, reducing the risk of urethral erosion, bladder spasms and trauma.

- The leg band, made entirely of soft stretch material, distributes compression evenly around the thigh to minimize circumferential pressure. Ideal for long-term catheterization.
- The adhesive patch, with a skin-friendly adhesive base, is ideal for short-term catheterized patients.
- The locking devices speed up application and simplify adjustment.
- The holders can be used with equal effectiveness on all Foley catheters including Teflon, silver and silicone coated catheters.
- Leg band/waist band ideal for bariatric patients.

Hold-n-Place Adhesive Patch
